Background and Objective

If you're a gym owner, you need a great website. First and foremost, it helps people to find you. Considering that all your competitors already have a website, you're behind the curve if you don't have one. It's not enough to just have a website; it needs to be a great website to establish your business as an authority, help manage your members, and so much more. Here are five reasons you need a great gym website.

Description of the Modules

1. Main Section

As the name suggests the Main section is the first page users see when they open our page. With limited functionality the main page shows the title and a top-most navigation bar that stays fixed while user scrolls through the page. The main page also has a "Register Now" button through which user can prompt to registration window.

About me

About Trainer

I am a trainer that leads, instructs, and motivates individuals or groups in exercise activities, including cardiovascular exercise (exercises for the heart and blood system), strength training, and stretching. Getting fit and staying fit takes a lot of work and motivation.

Read more

2. About Section

Like the main section, the About section to is a descriptive section where user can read about the Trainer and about training schedule and all toggle the Read More option to know more. Below the description are social media icons that link to social media handles of the site.

3. Sign Up Section

The Sign Up section where user can put all their details to register them as a gym member.

Description of the Modules

Our Services

What we Provide

4. Services Section

A brief description about all types of trainings we provide in this gym. Anyone can choose them accordingly of their goals.

5. Members about Trainer Section

This section tells all about trainer .The thoughts clients says about trainer.

Our Members

What our gym member says

Fitness trainers and instructors lead, instruct, and motivate individuals or groups in exercise activities, including cardiovascular exercises (exercises for the heart and blood circulation), strength training, and stretching. They work with people of all ages and skill levels.

Ankita Mishra, Gym Client

Our Works

What we Provide

6. Work Section

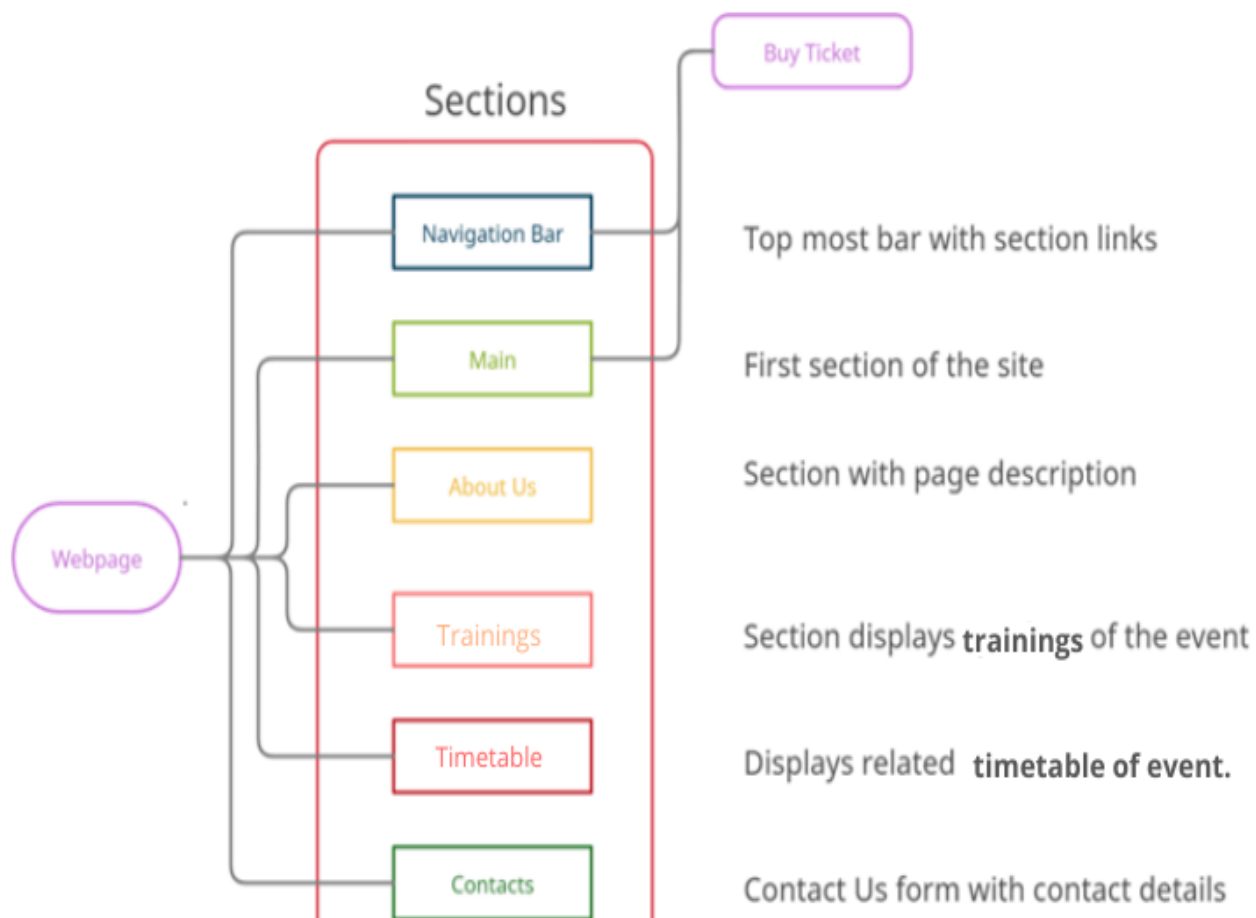

Here are the types of trainings we give .Here we are showing picture of our clints doing workout.

7.Queries/Contact Us Section

This section contains the Email, contact and address Of the Gym location and also contains the dm. Users can contact directly ask any queries releated.

Flowchart of the Website

Role of Each Member

Although we had to connect over the Internet, our group members were in constant contact throughout the project. We discussed every aspect of the project thoroughly. Despite being differences in knowledge we made sure each member understood and contributed equally towards the project. Overall, every member offered equally, below are the key points that we each member did:

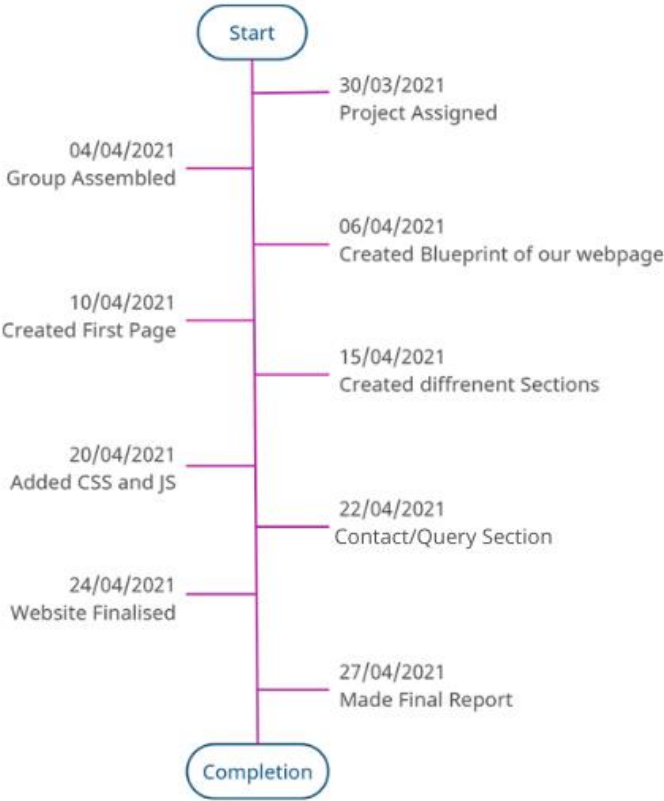

Tanmay Anand

- Created Home and About section.
- Helped in styling.
- Help designing the whole website.
- Help group mates in their part of work
- Created Speakers and News Section Navigation Bar.
- Added Scroll Animation.
- Overall Styling.

Pratham Thakur

- Help group mates in their part of work.
- Created the Contact form Created footer.
- Help designing the whole website.
- Help group mates in their part of work.
- Created Social Media icons.

Timeline of The Project

Implementation of The Project

To create this project, we used Visual Studio Code. The complete website has been created using HTML, CSS, JAVASCRIPT only. When we received our project, we decided to stick to the layout we were provided with. Therefore, our style tends to be similar to the sample image. We made our site look as simplistic as possible to create a vivid user experience. The complete website's layout has been created over tables and common CSS styling such as padding and text formatting. We also used some JavaScript to make the site more intuitive. We also stuck to a single font style and color pallet for the site which are shown below:

Font Used:

Roboto Mono

Colors Used:

#232531 – For Heading

#FF5733 – For Texts and Background

Page Sections:

We decided to use <section> instead of using different pages to make the website more compact. Then we added <href="#section"> to link to those sections and a JavaScript for scroll animation. Below is the code for different sections we used:

```
<section id="about">
  <div class="about-row">...
</div>
</section>
<section id="signup">...
</section>
<section id="services">
  <div class="services-info">...
</div>
  <div class="services-row">...
</div>
</section>
<section id="members">...
</section>
<section id="work">...
</section>
<section id="contact">...
</section>
<section id="footer">...
</section>
</body>
</html>
```

Navigation Bar:

The topmost navigation bar is not fixed. To the left is the site title and towards left are section links and the contact us and register now button.

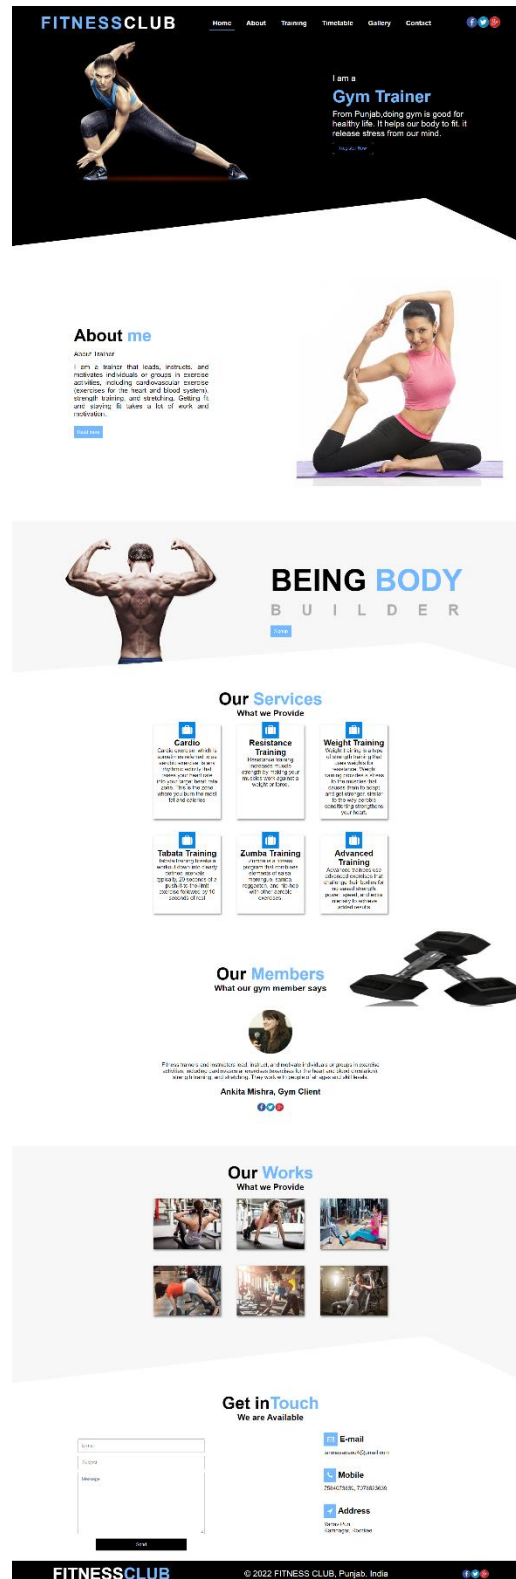

Contact Us/Query Section :-

The Contact Us/Query section is used to send some general information or to ask any query related. User can enter their name and email and subject and message to ask to a trainer. Presently the button is not functional as it will require higher knowledge which we wish to do later. Remaining part is styled using CSS. Some important code is shown below:

```
<section id="work">...
</section>
<section id="contact">
  <div class="services-info">
    <h1>Get in<span id="blue">Touch</span></h1>
    <p> We are Available</p>
  </div>
  <div class="contact-row">
    <div class="contact-left-col">
      <div class="form">
        <input type="text" name="" placeholder="E-mail">
        <input type="text" name="" placeholder="Subject"><br>
        <textarea rows="10" cols="40" placeholder="Message"></textarea>
        <br> <button class="c_btn">Send</button>
      </div>
    </div>
    <div class="contact-right-col">
      <h1><i class="fa fa-envelope-o" aria-hidden="true"></i> E-mail</h1> <p>tannayanand4@gmail.com</p><br>
      <h1><i class="fa fa-phone" aria-hidden="true"></i> Mobile</h1><p>7584073839, 7078823639</p>
      <br>
      <h1><i class="fa fa-location-arrow" aria-hidden="true"></i> Address</h1>
      <p>Yadav Puric<br>
      Ramnagar, Roorkee
      </p>
    </div>
  </div>
</div>
```

E-mail
Subject
Message
<div>Send</div>

Site Screenshot:

Technologies and Frameworks Used:

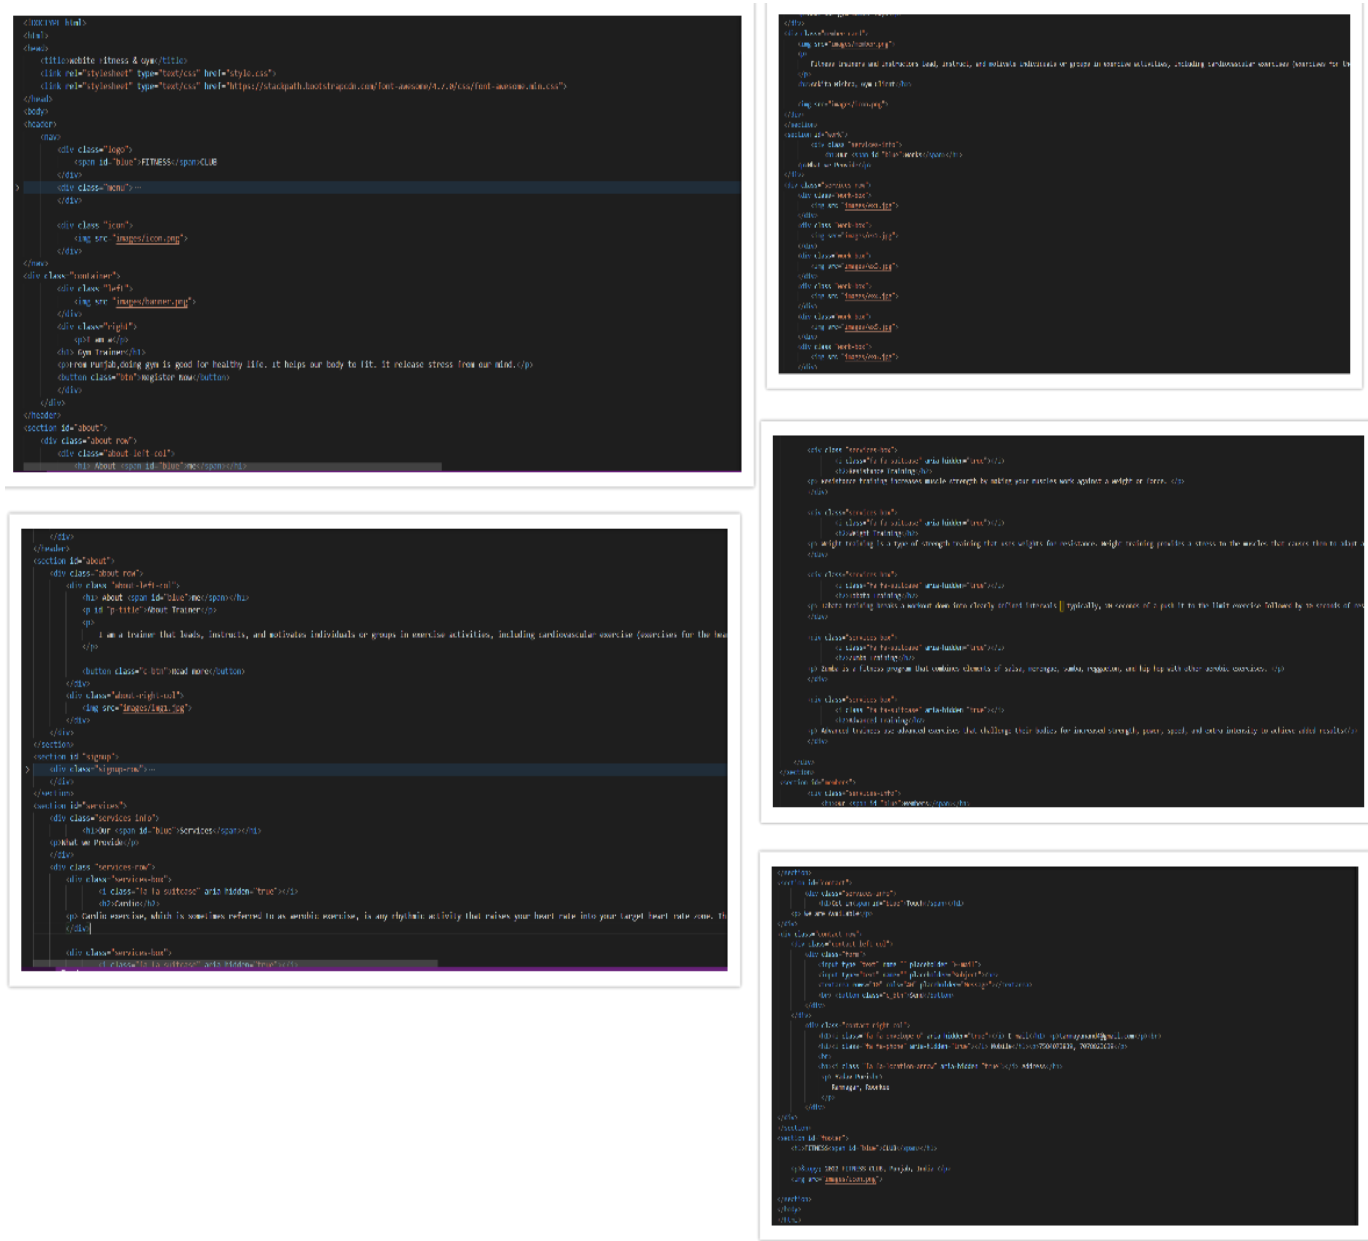

The website is created in Visual Studio and is written using:

For reference and knowledge, we did use these sites:

- <https://www.w3schools.com/>
- <https://stackoverflow.com/>
- Google Fonts, etc.

Screenshot of Our coding screen :-

About Our Website :-

Strengths:

- Responsive Website
- Intuitive and Compact
- Great UI

Weaknesses:

- The query does not do much.
- Site animations could be better .
